Simplified report development. The Simplified Report is formatted for quick data entry at the plane or strip and is generally less expensive to prepare and submit. It includes composite data, such as paints, materials and tools, but no specific information about the plane's specifics and specifications. **New!** **Cylinder Check. Add your engine size and cylinder characteristics to a report using this new Cylinder Check report function, which does not require any addenda specifications. *New!* **Plane Size Formula. Change your plane categorization using this new plane size formula report that exports the formula for applying the used wheels size to the prop receiver size to determine the plane size of your next airframe. Make sure to see the updated New Features section. **Simplified Report Schema. Update your existing Simplified report for the latest changes. *New* **Simplified Report schema. The Simplified Report Schema has been updated to include addendums and changes. When a no change addendum has been submitted, don't enter it in the Simplified report as a change but as a new addendum instead. *N

ew!* **Simplified Materials Report. Our Simplified Materials Report creates a set of aluminum and component cost reports that you can submit for materials you've used on a project 82157476af
